		WCD3048	30	48	30	670	

**Wall corner Cabinet and Lazy Susan Notes**

1. Wall corner cabinets have a single 45° angled door.
2. Wall corner cabinets can be routed for glass but are NOT suitable for internal lighting due to the reveal around the door.
3. Use a 3/4” end panel to finish a wall corner cabinet which does not have another cabinet next to it.
4. When using end panels, make sure to cut the panel as close as possible to the door so the reveal will be equal to the other reveals in the cabinet run (see diagram).
5. Due to the mechanical properties of the special hardware, in some applications the reveals on each side of the door may exceed the normal 1/8”.

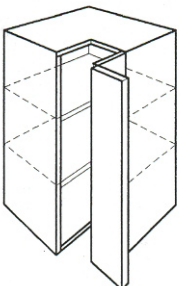

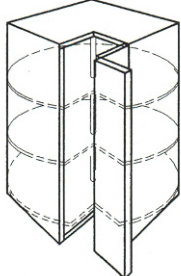

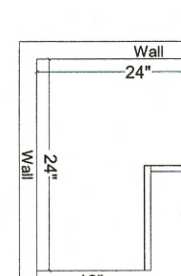

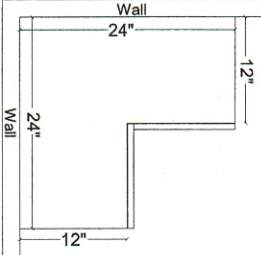

Add 10% if corner wall cabinet is taller than adjacent cabinets
